Jablonex® Strass Jewelry

Traditional Czech strass soldering technique

Based on the latest fashion trends

Our collections

Characteristics

How do we do it?

Tailor made service

Designed and produced in Europe

Full of colour and brightness, Jablonex® Strass Jewelry is a combination of the latest tendencies and colours mixed with traditional Bohemian soldering techniques.

We create unique pieces or small collections of 2 or 3 pieces.

All our pieces are made with the Bohemian traditional soldering technique using rhinestones and handmade stones of different providers.
Using brass settings plated with 27 options of top quality metals.

Necklaces and bracelets can come with enlargement chain.

Option of clip or studs for the earrings.

We mix leather and other materials when necessary.

We work every piece of jewelry:

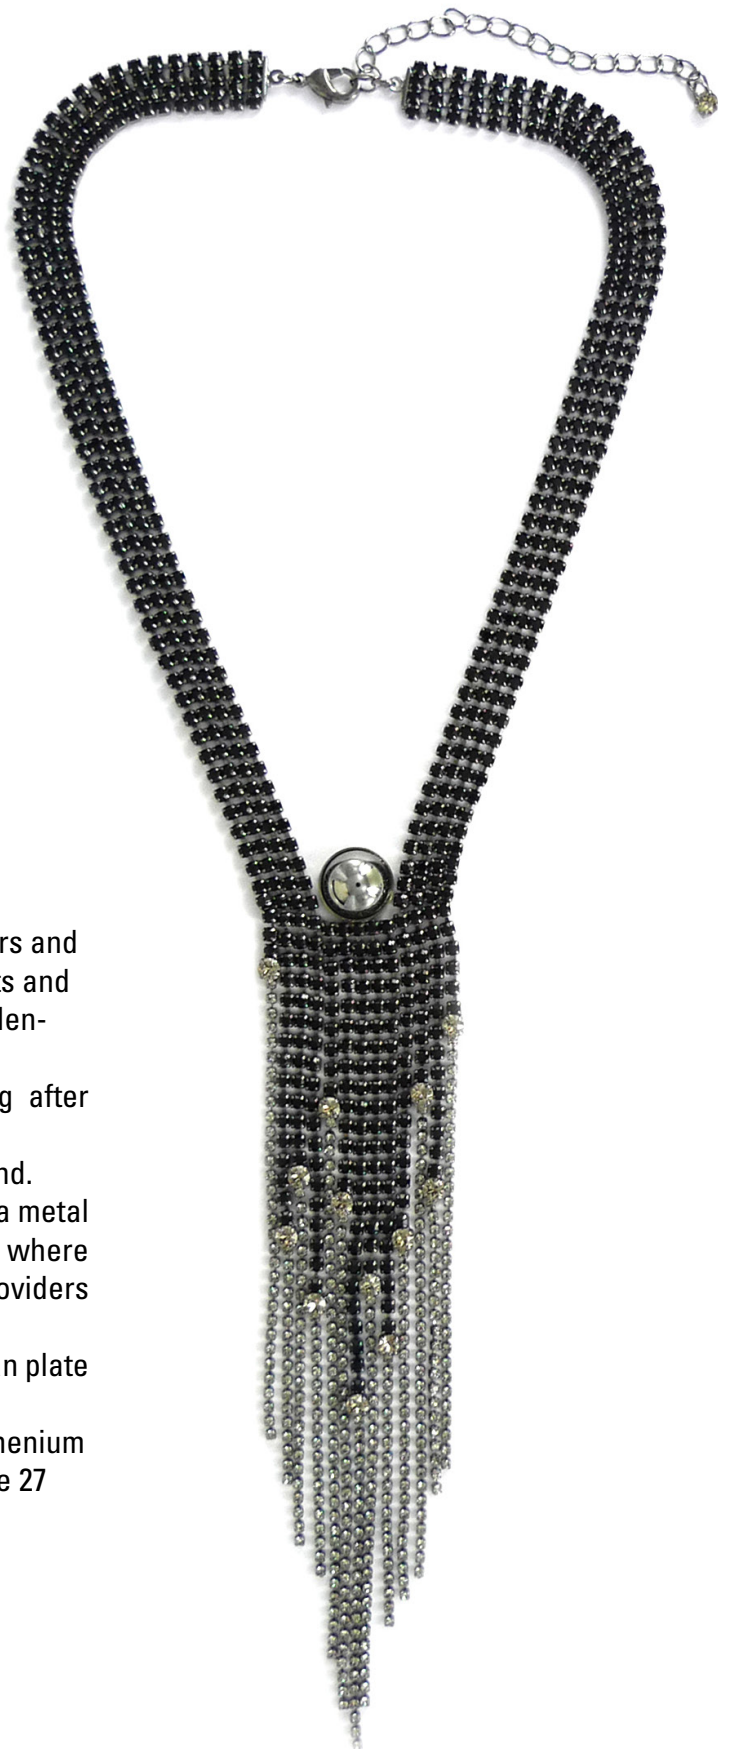

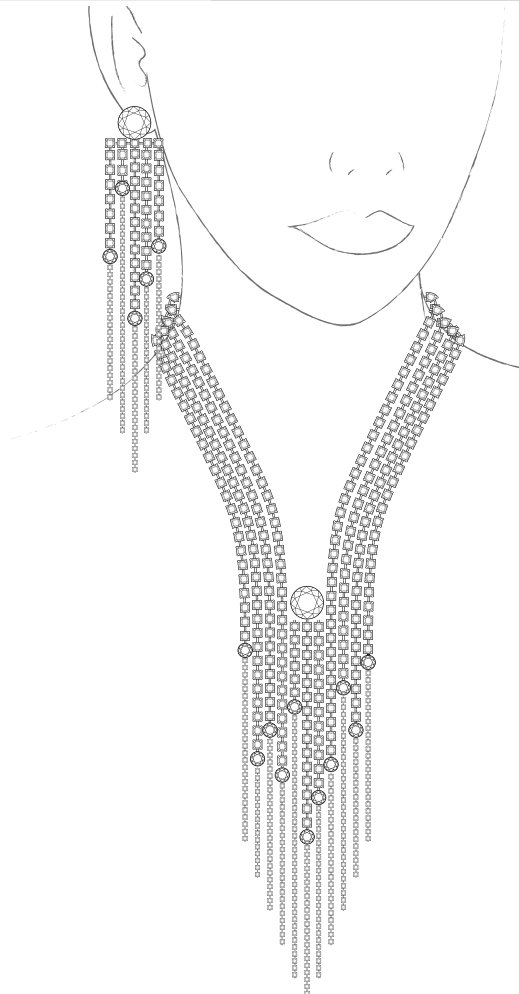

Necklaces, earrings, bracelets, brooches, tiaras, hair combs...

Productions are made by order.

We do not produce in advance in order to keep the quality of the product.

Time for production is one month and a half, always depending on quantities and availability of stocks.

There is color option available based on Preciosa®, Swarovski® and Jablonex® color charts.

We study the tendencies by attending fairs and catwalks, traveling, listening to our clients and searching information from the main tendencies forecasters.

All pieces are designed by 2D drawing after manual sketch.

Then transformed into a real piece by hand.

Strass soldering technique is made with a metal base made of brass that creates a setting where crystals from Jablonex® and other providers are set one by one.

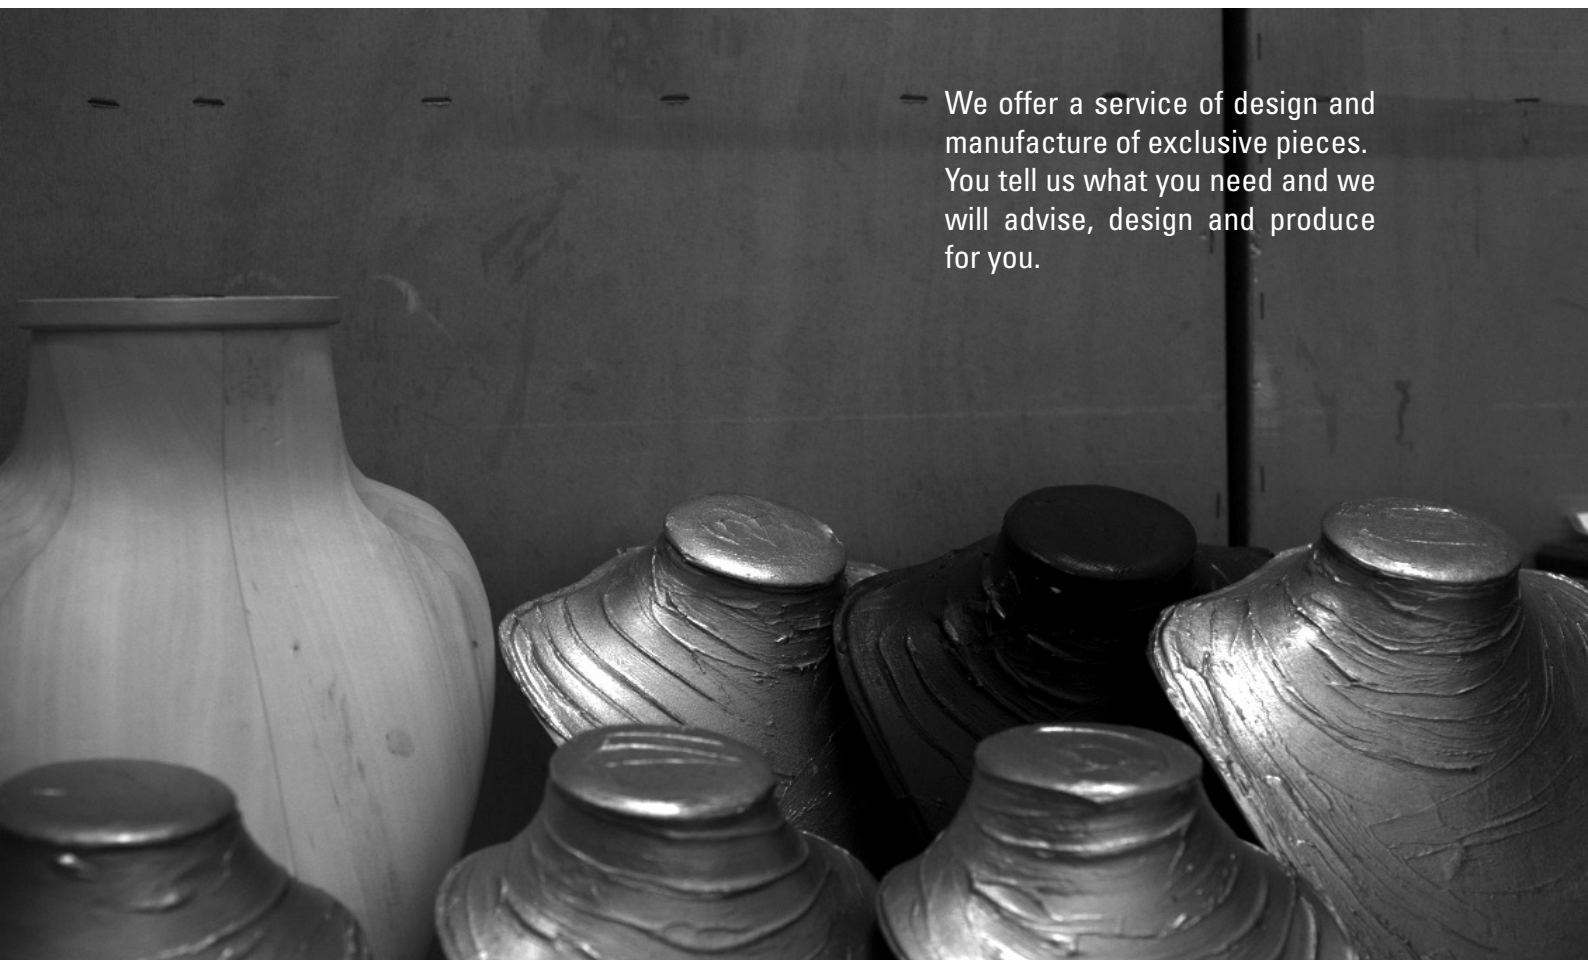

Once the shape is perfect it gets cleaned and plated with the metal colour.

We use real gold, silver, rhodium and ruthenium as basic metal platings, although we have 27 different platings.

All process is handmade.

We offer a service of design and manufacture of exclusive pieces. You tell us what you need and we will advise, design and produce for you.
