CERTIFIED GLASS BEADS & BUTTONS

AT JABLONEX we have been developing a new and unique product for the last 3 years.

Glass beads made with recycled bottles and jars.

We have achieved our main goal:

All of our shapes of glass beads and buttons are independently certified to the GRS (Global Recycled Standard)

DIRECTIONS OF USE

Kindly take into account the specific properties of products: small beads ought to be kept away from kids (hazardous to swallow and to inhale). Larger glass products should be protected against breakage (danger of sharp pieces of glass).

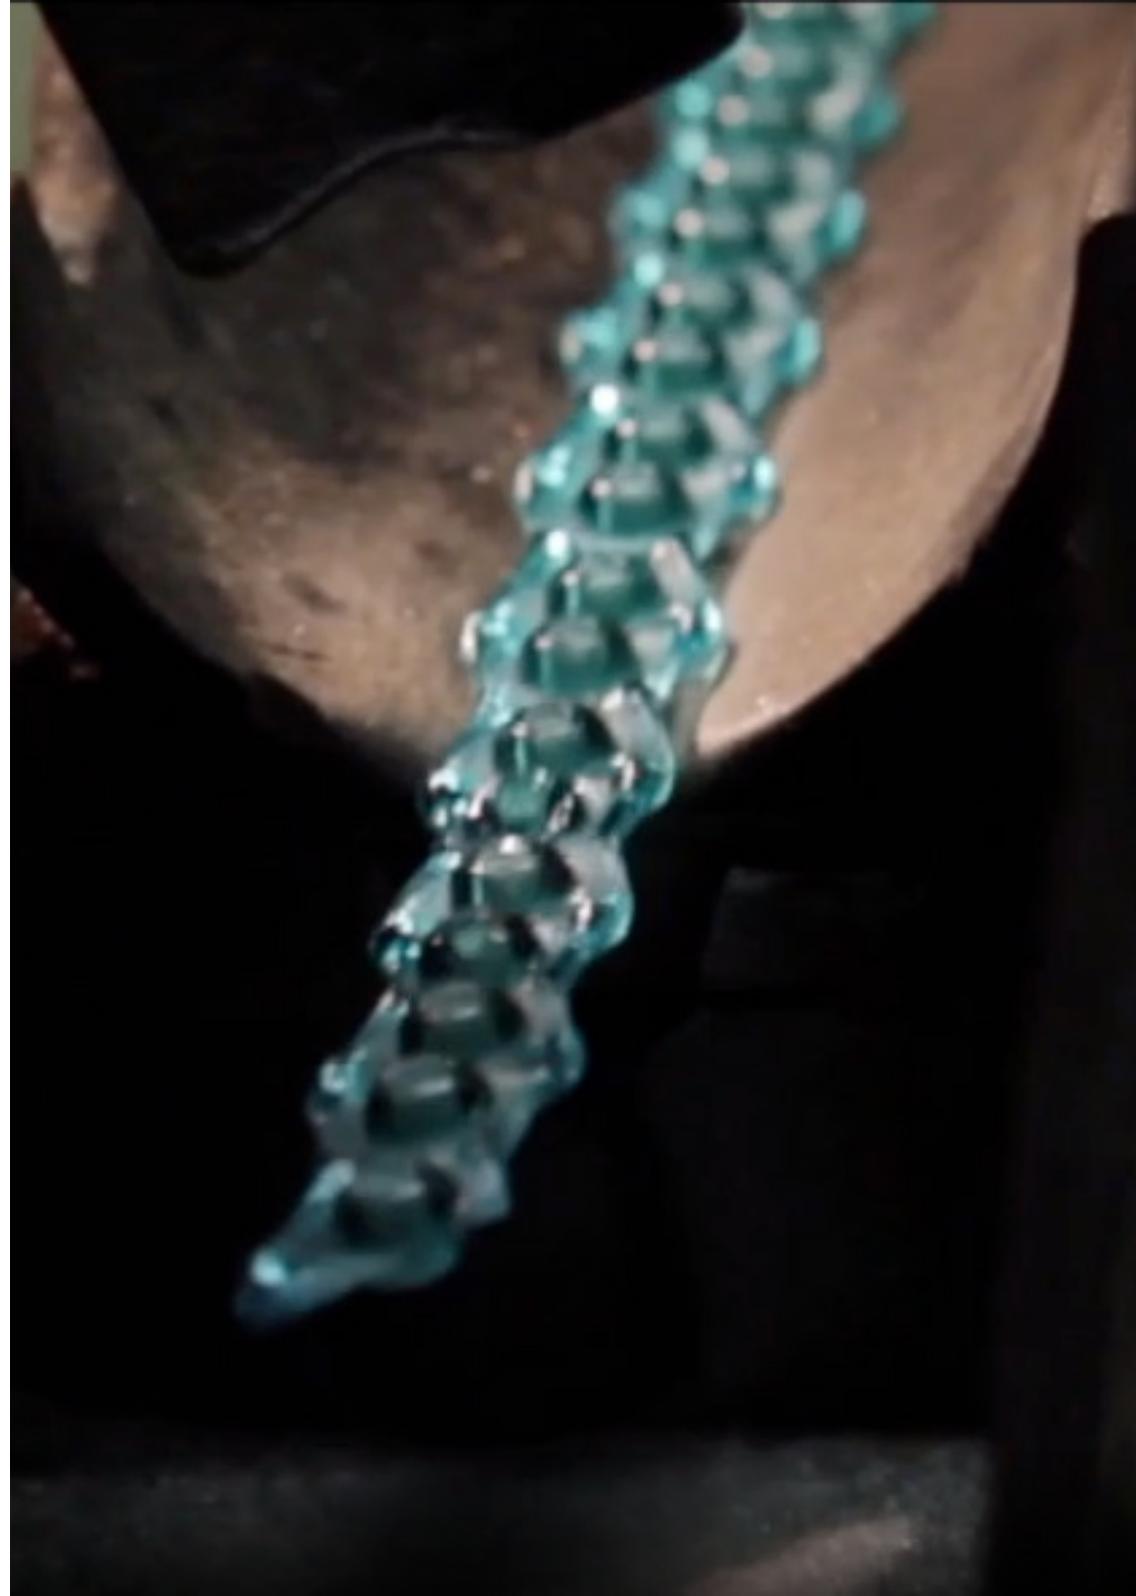

WARNING

Changes in colours are due to natural properties of glass. Even though this beads are not coated, they can have different hues of white and transparent.

OTHER IMPORTANT SPECIFICATIONS

Delivery subjected to order confirmation, for production check MOQ.

The product is delivered in recycled packaging.

Certified by CB-CUC- 1152044

What is GRS (Global Recycled Standard)?

Jablonex Recycled Beads is certified to the Global Recycled Standard (GRS), which certifies recycled glass from the source to final product.

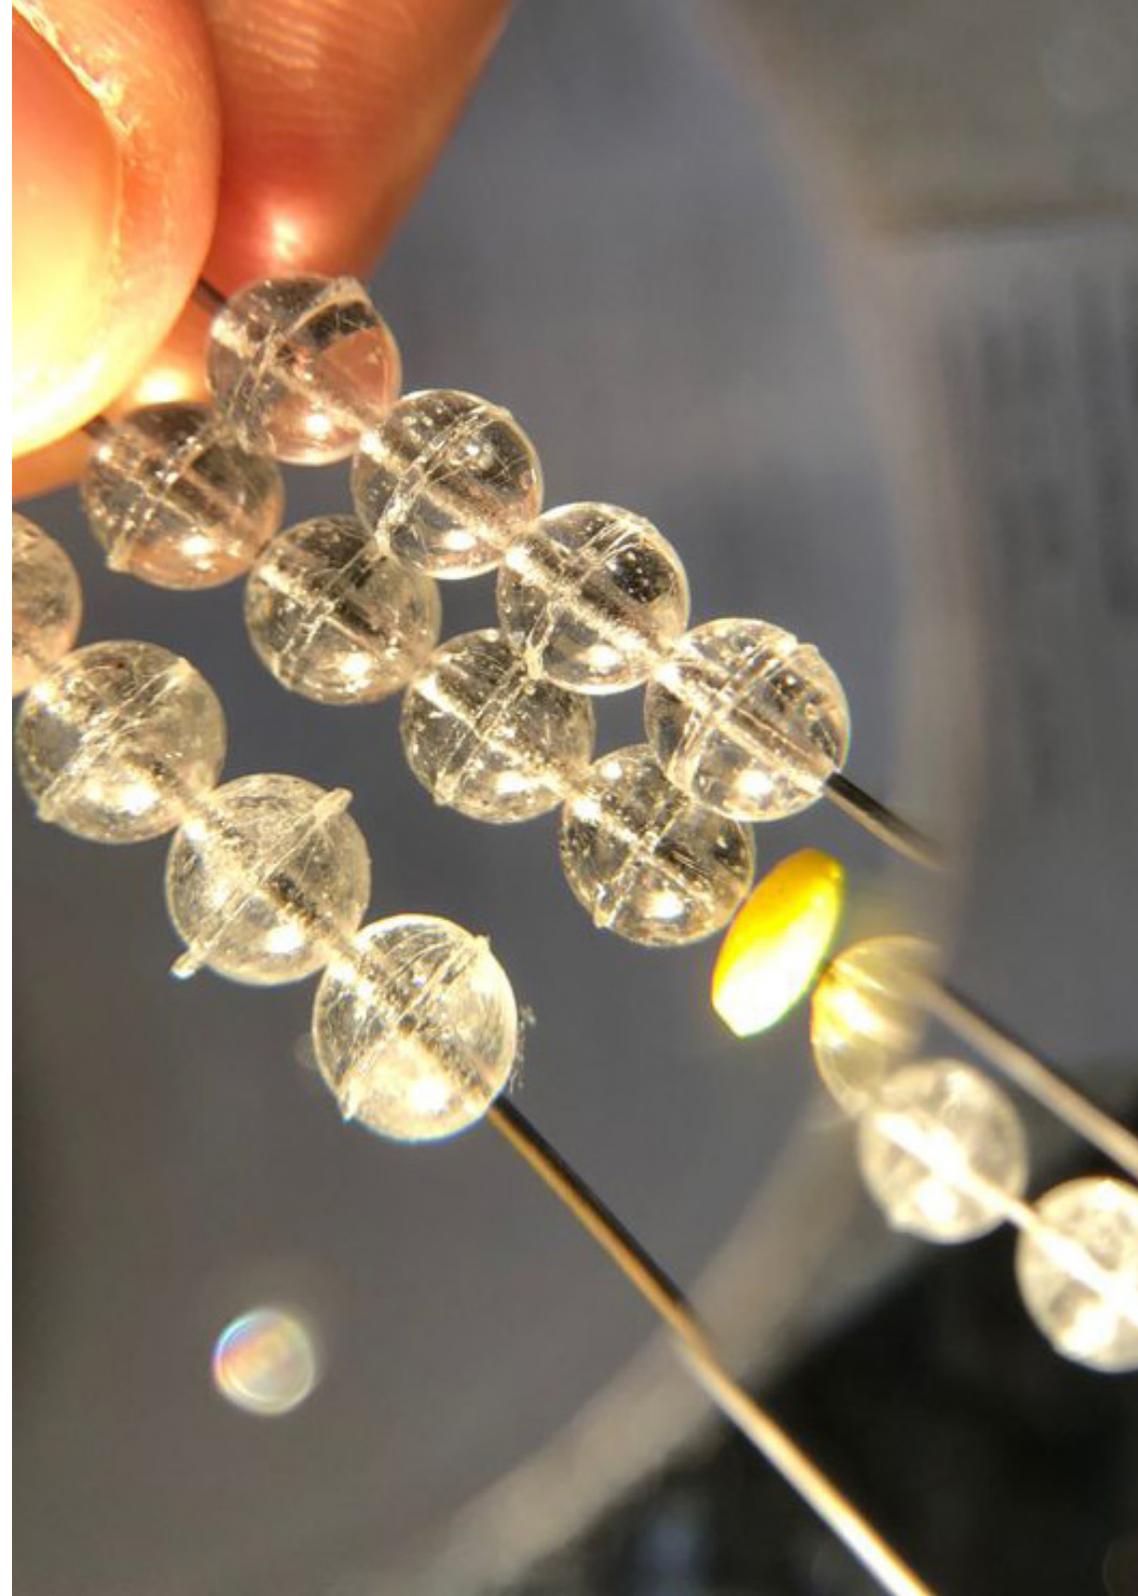

Products certified to the Global Recycled Standard (GRS) contain recycled glass that has been (independently) verified at each stage of the supply chain, from the recycler to the final product.

Why GRS?

We have been the first ones in the world to develop and produce recycled glass beads and buttons from bottles and jars. This standard is the best way to prove that our product is, not only recycled but environmentally and socially good too.

What products are certified?

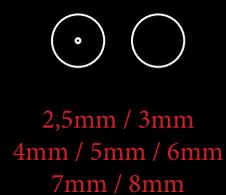

This catalogue contains all our Global Recycled Standard certified products.
